

SPRING & SUMMER NEWS 2024

SEGERS

We are launching a new fantastic collection with comfortable and stylish unisex garments, featuring elaborate details and environmentally friendly materials.

- Adjustable neck strap
- Two large front pockets
- Faux leather details on pocket for chef's side towel
- Washable at 60°C

4093 BIB APRON

Rustic bib apron in strong canvas fabric. Stylish washable faux leather details on pockets and on the bib. Spacious pockets, with faux leather details for securing a chef's side towel. Neck strap can be adjusted for length, with fixed-length straps at waist for tying front or back. A stylish and useful apron for kitchen/waiting/bar staff or for artisan professions.

We introduce Smart Unisex

Smart Unisex products are designed and developed from the start to fit both men and women. This applies to everything from the choice of materials, fit, and other details that ensure a product that everyone can use and, as always with Segers, can be worn frequently and for a long time.

A MORE SUSTAINABLE ALTERNATIVE

Segers Green products are designed to be used extensively and for a long time, created with environmentally friendlier materials.

Segers' own label, Segers Green, consists of products made from environmentally friendly materials with a long lifespan. At present, we have several items with a sustainability profile, and in the coming years, we will launch even more products. It is crucial to maintain a good lifespan for the clothes that can withstand handling, usage, and the number of washes. It doesn't benefit anyone to develop sustainable clothing without the right level of qualitative durability. Therefore, we rigorously test the products to ensure they meet Segers' quality standards. In the restaurant industry, there has always been a strong emphasis on products lasting a long time and maintaining their appearance even after the first or fiftieth wash.
